APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 43699 is issued subject to the terms and conditions imposed in said Permit 43699 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued under the provisions of NRS 534.120(2) as a preferred use.
(CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 6.0 cubic feet per second, but not to exceed 1000 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before March 29, 1991

Proof of completion of work shall be filed before April 29, 1991

Application of water to beneficial use shall be made on or before March 29, 1995

Proof of the application of water to beneficial use shall be filed on or before April 29, 1995

Map in support of proof of beneficial use shall be filed on or before N/A

Completion of work filed MAY 28 1991

Proof of beneficial use filed

(PERMIT TERMS CONTINUED)

The annual duty of water under this permit is initially limited to 500 acre-feet. At least 4 ground water monitoring wells are to be located or installed within the general area of the production well under this permit at locations approved by the State Engineer. These monitoring wells must be installed prior to any diversion of ground water allowed by this permit. The monitoring wells must penetrate at least 75 feet below the existing water table. The annual duty of water allowed by this permit may be raised to a maximum of 1000 acre-feet in stages and as approved and authorized by the State Engineer only after the State Engineer has determined that the additional withdrawal will not adversely affect existing rights or the ground water resource. The permittee will maintain pumping records on the amounts of water withdrawn and submit copies of these records to the State Engineer on a monthly basis. Water level measurements will be maintained on the monitoring wells and copies of these records will be submitted to the State Engineer on a monthly basis.

Item 7 & Item 8
